

MULTI PURPOSE

Moka Felt

Moka Felt is a unique tub chair which gives “waste” a second life. The self-supporting seat shell is made from recycled PET (Polythylene Terephthalate) bottles. The choice to use this innovative material is not only good for the environment, but it also looks and feels great. An additional positive feature is its sound absorbing quality.

The tub chair is available in light and dark grey felt and fitted with a seat pad. Also available with a cantilever or skid frame as well as a metal or solid beech four leg option.

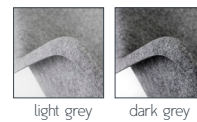

Find out more about Moka Felt’s sustainability properties: [click here](#).
